My business is going to be an Animal Rescue Service.

Animals that don't have a very good environment or home to live in will find help from us. Some animals are homeless and we are always there for them. Some animals are being treated very bad at the place their living at. People that care for the animals they have or used to have, a pet or want a pet and never had one; can use our services. If people see an animal being treated badly or don't have a home they can also see it on channel 172, our website or Channel 6. Some people feel animals should not get extinct.

Yes, I will need help because one person can't take care of a million animals. Our Animal Rescue Service is like the SPCA's and we will work with them, but it is different in that we will take care of the animals until they find a home.
