We will provide a service to help the poor find houses or help the way they live now. It is needed because some people can not afford houses, especially the homeless. We are going through a depression.

This service is for people who do not have money and for people that are poor. Also, homeless people and the needy. If the homeless have an address we can give them food stamps and help. My service will help them get an address so they can so they can get off the street. We will put fliers up and use billboards. We will raise money by a bake sale. or all us could chip in for a can drive.

I need people to help because it is not a one person job. Also, just by one person joining could influence others to join. The items I need are wood, tools and new objects for the house. But the item we would need the most would be people to help. We could provide food too. The costs are wood and objects and food and office supplies.
