Monkey Store

If I were to start a business, I would start a monkey store.

To get started I would need two big ships, so when one is loading the other will be unloading them. I will need a big store with three back rooms and a warehouse. One back room would be an office, another would be a vet room for monkeys, and the third room would be a petting zoo. The warehouse would be for storage. I would also need fruit to feed the monkeys. Another thing I would need would be monkey cages with monkey proof locks and little plastic trees inside. I also would sell collars that can be tracked so your monkey can't run away.

I think the people who will come to my store will be kids, lonely people, and playful people because monkeys are cute, playful, small, and friendly.

My business would be open from 8:00A.M. to 7:00 P.M on Tuesday, Wednesday, Thursday, and Friday but on Monday I would be open from 8:00A.M. to 5:00 P.M. I would put my store by the Elmira Mall. At my store I would provide many services. Some would be assistance for shopping, taking care of monkeys over vacation , treating fleas, selling stuffed monkeys, monkey doctor and more.

I think this business would be good because how often do you see monkeys in Western New York? Another reason is monkeys are playful and I like monkeys.

If I were to start a business I think a monkey store would definitely be a good choice.
